

FMJ AUTOMOTIVE

Automotive Engineers. Unit 8, 39 Tate Street, Bentley Western Australia

Specialists in repairs to all Jaguar vehicles and British and Italian sports cars, general repairs and refurbishments to all vehicles.

Background

During his earlier years Frank is very proud to have served his Mechanical Apprenticeship under the legendary Jim Percival at Roadbend Motors – Jaguar Independent Specialists. He joined Roadbend in 1966 and worked there for 13 years where he gained an enormous amount of knowledge on Jaguars and many British and other Sports Cars. In 1979 he left and joined John Whiteford, the owner of Western Auto-Dynamics for 2 years, before buying the Golden Fleece Service station on Welshpool Road with his two brothers.

Frank Fonte took over “Fonte Motors” from his younger brother Peter in 1983. At that stage they only operated as mechanical repair business. Later on Frank added the Jaguar name to become “Fonte Motors–Jaguar” as he specialised in them.

Frank, Andrew and apprentice Nick

Together with his wife Marilyn, who became responsible for all the Accounts, Administration and Invoicing duties, they have built a very reputable family business as it stands today. Following the Ford takeover of Jaguar, Frank was required to drop the Jaguar name from the business title and so it became FMJ Automotive.

His son Andrew joined the business in 2000 and together they have since increased their ability and business to do complete mechanical re-builds as well as the normal servicing and repairs. FMJ do not only work with Jaguars, but also all other British and Italian sports cars and all motor car repairs and refurbishments. During their peak FMJ Automotive employed 5 people on the floor and have also supported an apprentice programme
